Dickeya White Potato Meeting

Thursday, January 7, 2016

2:00 pm

Salem County Extension Office

51 Cheney Rd., Woodstown, NJ 08098

The New Jersey State Potato Association and Rutgers Cooperative Extension will be hosting a meeting for New Jersey and Delaware growers plus interested industry personnel to review the effect of *Dickeya* (blackleg pathogen) on the 2015 white potato crop and prospective for 2016.

Dr. Stephen Johnson, Extension Plant Pathologist, University of Maine will present his experiences this past summer and fall with *Dickeya*. Dr. Johnson is the potato plant pathologist for the State of Maine for over twenty years. His experience with potato diseases and potato growers give him the knowledge and background to clarify all aspects of this disease.

This is your opportunity to learn the latest information and help you make decisions for your 2016 potato seed orders.

If you can't make this meeting, there will be another opportunity on Friday, January 8th at 2:30 pm at the Pennsylvania Farm Show Complex, Monongahela Room, 2nd Floor, 2302 N. Cameron Street, Harrisburg, PA.

Rutgers Cooperative Extension 100 Years of Service in Cumberland County

FOOD SAFETY MODERNIZATION ACT PRODUCE SAFETY RULE TRAINING

Wesley Kline

Introduction

Fruit and vegetables growers and others interested in learning about produce safety, Good Agricultural Practices (GAPs), co-management, and the Food Safety Modernization Act (FSMA) Produce Safety Rule should be interested in this training. The Produce Safety Alliance (PSA) Grower Training Course is one way to satisfy the FSMA Produce Safety Rule requirement outlined in § 112.22(c) that requires 'At least one supervisor from the farm must complete food safety training at least equivalent to the standardized curriculum recognized by the FDA'.

What to Expect at the PSA Grower Training Course

This is approximately a seven hour course to cover these seven modules:

- Introduction to Produce Safety
- Worker Health, Hygiene, and Training;
- Soil Amendments
- Wildlife, Domesticated Animals, and Land Use
- Agricultural Water (Part I: Production Water; Part II: Postharvest Water)
- Postharvest Handling and Sanitation
- How to Develop a Farm Food Safety Plan

In addition to learning about produce safety best practices, parts of the FSMA Produce Safety Rule requirements are outlined within each module. There are time for questions and discussion, so participants should come prepared to share their experiences and produce safety questions.

Benefits of Attending the Course

The course provides a foundation of Good Agricultural Practices (GAPs) and co-management information, FSMA Produce Safety Rule requirements, and details on how to develop a farm food safety plan. Individuals who participate in this course are expected to gain a basic understanding of:

- Microorganisms relevant to produce safety and where they may be found on the farm
- How to identify microbial risks, practices that reduce risks, and how to begin implementing produce safety practices on the farm
- Parts of a farm food safety plan and how to begin writing one
- Requirements in the FSMA Produce Safety Rule and how to meet them.

After attending the entire course, participants will be eligible to receive a certificate from the Association of Food and Drug Officials (AFDO) that verifies they have completed the training course. To receive an AFDO certificate, a participant must be present for the entire training and submit the appropriate paperwork and an additional fee of \$35.00 to the trainer at the end of the course.

FSMA training vs 3rd party audits

This FSMA training does not take the place of a 3rd party audit. The Food and Drug administration considers this training to be the baseline for food safety. Whether an operation needs a third party audit will

be up to your buyer in the wholesale trade.

Training Compliance Dates

Farms that have an annual value of produce sold during the previous three-years of \$25,000 or less are exempt from the produce rule and do not need to be trained.

If the farm just grows for commercial processing that adequately reduces the presence of microorganisms the operation may be exempt.

There is a qualified exemption for eligible farms, but the following criteria must be met.

1. The farm must have **food sales** averaging less than \$500,000 per year during the previous three years and
2. The farm's sales to qualified end-users must exceed sales to all others combined during the previous three years. In other words at least 51% of your product must be for retail. A qualified end-user is either
 - a. (a) the consumer of the food or
 - b. (b) a restaurant or retail food establishment that is located in the same state or the same Indian reservation as the farm and not more than 275 miles away.

When the training needs to be completed depends on the size of your operation.

Very small farm – Those with more than \$25,000, but no more than \$250,000 in average annual produce sales during the previous three year period have four years.

Small farm – Those with more than \$250,000, but no more than \$500,000 in average annual produce sales during the previous three years period have three years.

All other farms – Two years.

It is hoped that the farms that are exempt will still take advance of the training to be up to date on food safety concerns and how to improve their operations.

****NOTE:** The operation must have the records to show they met the criteria for very small or small farm status, so the latest you can wait to start collecting sales records is 1 year for very small farms and for small farms records will be needed starting in January 2016.

EPA Extends Comment Period for Proposed Pesticide Applicator Certification Rule

EPA is extending the public comment period on the proposed changes to the certification rule for an additional 30 days. EPA is proposing stronger standards for pesticide applicators who are certified to apply the riskiest pesticides, known as restricted use pesticides (RUPs). The goal is to reduce the likelihood of harm from the misapplication of RUPs and ensure a consistent level of protection among states. More information about this rule is available at <http://www2.epa.gov/pesticide-worker-safety/epa-proposes-stronger-standards-people-applying-riskiest-pesticides>.

A formal announcement of the 30-day extension to the comment period will be published in the Federal Register shortly. The closing date for comments is now January 22, 2016.

Comments can be submitted via www.regulations.gov under docket number [EPA-HQ-OPP-2011-0183](https://www.regulations.gov/docket/EPA-HQ-OPP-2011-0183).

2016 Vegetable Grower of the Year

Ed Wuillermin & Sons Farm to be Awarded Vegetable Grower of the Year at the 2016 New Jersey State Agricultural Convention

The cover story on the August 1995 issue of American Vegetable Grower magazine features a photo Ed Wuillermin Sr. and his sons Ed Jr. and August for an article titled "*Ed Wuillermin & Sons: New Jersey's Pick of the Crop*". In February 2016, Eddie and Augie will be the pick of the crop again as the Vegetable Growers' Association of NJ honors them with their Vegetable Grower of the Year award at their annual convention and trade show in Atlantic City.

Their farm located in Hammonton was started by their grandfather, Augusto, and consisted of 25 acres of fruit. In 1943, after his Father's passing, Ed Sr. continued farming and expanded into vegetables with purchases of additional land. When Ed Sr.'s brother August returned from the service in the late 1950s they formed Wuillermin Bros. and farmed together until the early 1980s. At that time, they split their business into Ed Wuillermin & Sons and August C. Wuillermin Farms, respectively, and the next generation has continued the farming traditions of both operations.

Today Ed Wuillermin & Sons raise 275 acres of mixed vegetables for the fresh market and is currently owned/operated by Ed Jr. and August, with Augie's sons August and Michael now working on the farm. They've always been innovative, early adopters employing labor saving and quality enhancing technologies (harvest aid in field, mechanical corn harvester, video color sorter for pepper packing/grading, on-farm hydro-cooler and cold storage), as well as labor management techniques (profit sharing, health benefits, and more).

Growing up on the family farm on the south side of Hammonton, Eddie and Augie learned from a young age the importance of being involved in the organizations that impact the family business and community.

Joining the Atlantic County Board of Agriculture in 1987, Augie has served on nearly every committee and rose to president in 2001 and 2002. For more than fifteen years, Augie, like his father before him, has been a dedicated and staunch advocate as Atlantic County's delegate to the New Jersey Farm Bureau. There he has stood resolutely not only for the interests of Atlantic County agriculture, but all south Jersey farmers, especially those working within the jurisdiction of the New Jersey Pinelands Comprehensive Management Plan. His experience and leadership have been invaluable in his current roles representing Atlantic County on the Pinelands Agricultural Advisory Committee, and as a member of the New Jersey Agricultural Experiment Station's Board of Managers. Following in his father's footsteps, Augie was recently nominated to serve on the New Jersey State Board of Agriculture.

Likewise, Eddie has also been active in the vegetable industry and community, serving as director of original Jersey Tomato Co-op; director at Vineland Produce Co-op; as a member of NJ Pinelands Commission; as Councilperson, Deputy Mayor and member of the Planning Board for the Town of Hammonton; and as a Charter Member of the Atlantic County Transportation Authority.

Ed Wuillermin & Sons were among the first to enroll in the NJ Ag Society's 'Farmers Against Hunger' program and have donated thousands of pounds of produce since its inception. Ed and Augie have also been active in the Rutgers Cooperative Extension Pepper Advisory Committee, long time participants in the Rutgers Vegetable IPM program, and work closely with RCE in adopting food safety, post-harvest handling, and production technologies.

NJWEA Scholarships Available Applications Due March 2, 2016

The New Jersey Water Environment Association (NJWEA) is pleased to offer its Scholarship Awards Program, named in honor of Dr. Raymond M. Manganelli, former Professor of Environmental Science at Rutgers University, and former Chair of the Association's Student Programs and Scholarship Awards Committees. NJWEA scholarship awards are available each year, ranging from \$2,000 to \$2,500 each, and totaling \$38,500 annually. In addition, the three regional sections of the NJWEA offer eleven scholarships totaling \$17,000. In total the program offers 28 awards with an annual value on \$55,500.

These awards are intended for both graduate and undergraduate students, including those attending county colleges, and technical schools, as well as high school seniors.

For more information and to apply today, please visit <http://www.njwea.org/committees/educational/scholarship-awards-committee/>

NAP 2016 Coverage Deadline Approaching

FSA, 1318 S. Main Rd., Bldg. 5A, Vineland, NJ 08360 856-205-1225 x2

The noninsured crop disaster assistance program (NAP) is a federally funded program that helps producers reduce their risk when growing food and fiber crops, specialty crops and crops for livestock feed. These benefits are only available for crops for which the catastrophic level of crop insurance is not available. Application for coverage must be filed by the applicable crop's application closing date.

March 15, 2016: all beans, brussel sprouts, cantaloupe, celery, corn (popcorn and processing sweet corn), cucumbers, eggplant, honeydew, oats, okra, peppers, pumpkins, sorghum, squash, sweet potatoes, tomatoes, watermelon and yams.

Producers must choose either CAT or buy-up coverage by March 15, 2016 for the above listed crops.

Farm Loans Available

There are several types of Farm Loans available from the Farm Service Agency.

The following types are available:

- Direct Operating or Farm Ownership Loan
- Emergency Loans
- Guaranteed Operating Loan or Farm Ownership Loan
- Microloans
- Youth Loans

Please contact Ellen Schmidt, Farm Loan Manager at 856-205-1225 Ext. 121 or David Frank, Farm Loan Officer trainee at 856-205-1225 Ext. 118

Funding available for New Jersey Landowners to Protect Agricultural Working Lands, Grasslands and Wetlands

Natural Resources Conservation Service

<http://www.nj.nrcs.usda.gov>

Private landowners and eligible entities encouraged to apply by January 15, 2016.

Carrie Lindig, New Jersey State Conservationist for USDA's Natural Resources Conservation Service (NRCS) anticipates that \$5 million will be available to provide long-term protection of New Jersey's farmland, wetlands and grasslands in 2016 through the Agricultural Conservation Easement Program (ACEP).

"Conservation easements are an important tool to help landowners and partners voluntarily protect these vital resources for future generations," Lindig said. According to Lindig, about \$5 was invested to enroll nearly 475 acres in the program in New Jersey in fiscal year 2015.

The program, established through the 2014 Farm Bill, combines opportunities previously offered through three separate easement programs into one.

ACEP's agricultural land easements not only protect the long-term viability of the nation's food supply by preventing conversion of productive working lands to non-agricultural uses, but they also support environmental quality, historic preservation, wildlife habitat and protection of open space. State and local governments and non-governmental organizations that have farmland or grassland protection programs are eligible to partner with NRCS to purchase conservation easements. A key change under the new agricultural land easement component is the new "grasslands of special environmental significance" that will protect high-quality grasslands that are under threat of conversion to cropping, urban development and other non-grazing uses.

Wetland reserve easements allow landowners to successfully enhance and protect habitat for wildlife on their lands, reduce impacts from flooding, recharge groundwater and provide outdoor recreational and educational opportunities. NRCS provides technical and financial assistance directly to private and tribal landowners to restore, protect and enhance wetlands through the purchase of these easements, and Eligible landowners can choose to enroll in a permanent or 30-year easement.

ACEP applications may be submitted at any time to NRCS; however, applications for the current funding round must be submitted on or before January 15, 2016.

This past September, USDA Secretary Tom Vilsack announced \$350 million in financial and technical assistance available through the program would be available nationally.

To learn about ACEP and other technical and financial assistance available through NRCS conservation programs, visit www.nrcs.usda.gov/GetStarted or your local USDA Service Center at 1318 S. Main Road, Bldg. 5, Suite A, Vineland.

USDA Announces Enrollment Period for Safety Net Coverage in 2016

Kent Politsch (202) 720-7163

U.S. Department of Agriculture (USDA) Farm Service Agency (FSA) Administrator Val Dolcini announced that producers who chose coverage from the safety net programs established by the 2014 Farm Bill, known as the Agriculture Risk Coverage (ARC) or the Price Loss Coverage (PLC) programs, can begin visiting FSA county offices starting Dec. 7, 2015, to sign contracts to enroll in coverage for 2016. **The enrollment period will continue until Aug. 1, 2016.**

“The choice between ARC and PLC is completed and remains in effect through 2018, but producers must still enroll their farm by signing a contract each year to receive coverage,” said Dolcini.

Producers are encouraged to contact their local FSA office to schedule an appointment to enroll. If a farm is not enrolled during the 2016 enrollment period, producers on that farm will not be eligible for financial assistance from the ARC or PLC programs should crop prices or farm revenues fall below the historical price or revenue benchmarks established by the program.

The two programs were authorized by the 2014 Farm Bill and offer a safety net to agricultural producers when there is a substantial drop in prices or revenues for covered commodities. Covered commodities include barley, canola, large and small chickpeas, corn, crambe, flaxseed, grain sorghum, lentils, mustard seed, oats, peanuts, dry peas, rapeseed, long grain rice, medium grain rice (which includes short grain and sweet rice), safflower seed, sesame, soybeans, sunflower seed and wheat. Upland cotton is no longer a covered commodity. For more details regarding these programs, go to www.fsa.usda.gov/arc-plc.

For more information, producers are encouraged to visit their local FSA office. To find a local FSA office, visit <http://offices.usda.gov>. The Cumberland County office is located at: 1318 S. Main Road, Bldg. 5, Suite A, Vineland, NJ.

The ARC and PLC programs were made possible by the 2014 Farm Bill, which builds on historic economic gains in rural America over the past six years, while achieving meaningful reform and billions of dollars in savings for taxpayers. Since enactment, USDA has made significant progress to implement each provision of this critical legislation, including providing disaster relief to farmers and ranchers; strengthening risk management tools; expanding access to rural credit; funding critical research; establishing innovative public-private conservation partnerships; developing new markets for rural-made products; and investing in infrastructure, housing and community facilities to help improve quality of life in rural America. For more information, visit www.usda.gov/farmbill.
