SAVE THE DATE

What: Retirement Open House for Helen Elwell
Date: Sunday, December 19, 2010
Where: Rutgers Cooperative Extension Cumberland County
291 Morton Avenue, Millville (between Rosenhayn and Carmel)
Time: 3:00-6:00 p.m.

Join us as we wish Helen the best. Helen begins her retirement on January 1, 2011. We will be having light refreshments at the Cumberland County Extension Office, 291 Morton Avenue (between Rosenhayn and Carmel) from 3:00 p.m. to 6:00 p.m. on December 19, 2010.

Everyone is welcome to join us whether you can stay 10 minutes or the whole time. Come reminisce with Helen about all the changes in the last 41 years.

If you have any questions, please contact Tammy Commander in the Agriculture Department at 856-451-2800 x1.
Trevor Suslow, PhD to be the keynote speaker at the Atlantic Coast Agricultural Convention January 11, 2011 at the Trump Taj Mahal in Atlantic City.

Dr. Suslow is a national authority on food safety as it relates to pre and postharvest handling and water quality issues. He is an extension research specialist at the University of California, Davis, Department of Plant Sciences, with statewide responsibilities in quality and safety of perishable horticultural commodities. Suslow’s program involves preharvest and postharvest research and outreach education on diverse fresh and fresh-cut horticultural foods. His emphasis is postharvest pathology and microbiology, the role of environment and crop product practices on postharvest attributes of edible horticultural crops, microbial safety and disinfection of preharvest and post harvest water, biological control and other biologically mediated controls of postharvest diseases and pathogens of human food safety concern. Dr. Suslow combines lab and on-farm research related primarily to E. coli and Salmonella, in conventional and organic production systems, for the purpose of identifying opportunities for optimal microbial reductions and delivery of safety food to the consumer. Dr. Suslow is a member of the Center for Produce Safety Advisory Board and its Technical Advisory Committee and received his BSc in Agricultural Sciences with honors and his PhD in Plant Pathology from the University of California, Berkeley.

Tuesday morning will kick off with four sessions: farm safety, greenhouse floriculture, bioenergy/energy conservation and pepper production. Dr. Suslow will then speak in the general session; followed by two other speakers on the history and future of cooperative extension and applied research in New Jersey.

Wednesday morning starts out with sessions ranging from soil borne pathogens and bio fumigants, season extension in fruits and vegetables, forage production, small fruit production and pest management. Wednesday afternoon there are four sessions: tomatoes where growers will learn about selection for better flavor and grafting for yield. The session will be followed by a workshop on grafting where growers will have the opportunity to graft their own plants. Other sessions include new technologies in agriculture, field crop production and blueberries.

Thursday will have three sessions in the morning: direct marketing, preparing for a USDA Third Party Audit, and agribusiness. The third party audit session is for those who have not been through training in the last year or who want a refresher. The New Jersey Agribusiness Association is sponsoring the agribusiness session for a second year.

Along with the educational sessions, visit the trade show and talk to vendors about your needs for 2011!
Need Pesticide Recertification Credits – Check the DEP Website

If you are in need of pesticide credits to keep your license active, the DEP has a website you can search. The website allows you to search for specific categories (PP2 through 13) and Core.

The initial website address is http://www.state.nj.us./dep/enforcement/pcp/

The home page – Compliance & Enforcement – will load. In the second box below the ladybug picture, is "ONLINE REPORTS" link in blue typeface. Click on ONLINE REPORTS and that will open the DEP Data Miner database. Scroll to the bottom of the page and choose the link in blue typeface entitled "Recertification Courses Available."

You will need to enter a start date, an end date and the subject (category) that you need. You may select multiple subject areas (categories) by using the CTRL (control) key. Once you have made your selection, click on the “OK” box. When the search is completed the courses fitting the selected criteria will appear showing the course date, course number and name, county location, contact person with phone number and the units awarded.

Every time credits are requested for a meeting, the DEP updates this database.

Turfgrass Expo

This year’s Turfgrass Expo will be held at the Trump Taj Mahal Casino/Resort on December 7-9, 2010. This is a great opportunity to receive the latest turf management information from nationally renowned speakers. For additional information, please contact Cece Peabody (973) 812-6467, e-mail execdirector@njturfgrass.org or Anne Diglio (732) 932-9400 ext. 339, e-mail diglio@aesop.rutgers.edu.

Farm Service Agency (FSA)

The USDA Service Center, which includes the Farm Service Agency, Natural Resources Conservation Service and Rural Development, has changed locations. They have moved right across the street. The new address is 1318 S. Main Road., Bldg. 5, Suite A, Vineland, NJ 08360. The phone numbers and extensions are still the same. Visit them at their new location!
The following Rutgers Fact Sheets were released in 2010:

VegNet
The Ohio State University Extension

DATE:  November 1st, 3rd, 8th, 16th and 18th

WHAT:  Season Extension and High Tunnel Webinar Series

Learn more about pest management in season extension production systems such as high tunnels by registering for a new webinar series sponsored by the Great Lakes Vegetable Working Group, The University of Illinois Extension and a Sustainable Agriculture Research and Education Professional Development grant. There will be 1-2 hour webinars produced in November. The first three sessions will focus on an introduction to pest management in various season extension systems, focusing on tomatoes and winter crops. The last two sessions will be geared toward soil, water and nutrient management, plus a summary of the Environmental Quality Incentive Program (EQIP) high tunnel pilot project initiated in 2010.

Pre-registration is mandatory and can be done at:  http://www.surveymonkey.com/s/season.ext

The cost for the series is $30 whether you attend one or all five sessions. Please note that webinars 1, 2 & 3 will be held 6:30-8:30 pm EST and that webinars 4 & 5 will be held 1-2 pm EST.
Biomass Energy Day

You may remember that in 2008-2009 NJ Farm Bureau in cooperation with RCE/NJAES and others hosted a series of meetings on solar and wind energy for the farm. NJFB, working with our Sustainable Energy Working Group here at NJAES/RCE, will host a day-long meeting on Biomass Energy at the Ecocomplex on November 18th. It will feature several NJAES/RCE scientists, practitioners and government agency representatives outlining the potential and various programs for production and use on NJ farms. Further details to follow.

Farm Storage Facility Loan Program

The Farm Storage Facility Loan (FSFL) program allows producers of eligible commodities to obtain low-interest financing to build or upgrade farm storage and handling facilities.

The new maximum principal amount of a loan through FSFL is $500,000. Participants are now required to provide a down payment of 15%, with CCC providing a loan for the remaining 85% of the net cost of the eligible storage facility and permanent drying and handling equipment. New loan terms of 7, 10 or 12 years are available depending on the amount of the loan. Interest rates for each term rate may be different and are based on the rate which CCC borrows from the Treasury Department.

Payments are available in the form of a partial disbursement and the remaining final disbursement. The partial disbursement will be available after a portion of the construction has been completed. The final fund disbursement will be made when all construction is completed. The maximum amount of the partial disbursement will be 50% of the projected and approved total loan amount.

Applications for FSFL must be submitted to the FSA county office that maintains the farm’s records. An FSFL must be approved before any site preparation or construction can begin.

The following commodities are eligible for farm storage facility loans:

- Corn, grain sorghum, rice, soybeans, oats, peanuts, wheat, barley or minor oilseeds harvested as whole grain
- Corn, grain sorghum, wheat, oats or barley harvested as other-than-whole grain
- Pulse crops - lentils, small chickpeas and dry peas
- Hay
- Renewable biomass
- Fruits (including nuts) and vegetables - cold storage facilities

For more information about FSFL please visit your FSA county office or visit: www.fsa.usda.gov
FSA Announces New Conservation Loan Program

Farm Service Agency September Newsletter

The Farm Service Agency makes and guarantees conservation loans on farms and ranches to help conserve our natural resources. The Conservation Loan (CL) Program provides farmers with the credit necessary to implement conservation measures on their land. The direct CLs loan limit is up to $300,000 and guaranteed CLs up to $1,112,000 (amount adjusted for inflation), may be available by applying with lenders working with FSA to obtain a guarantee.

Applicants will work with Natural Resources and Conservation Service (NRCS) Staff to develop a conservation plan. Conservation practices must be approved by NRCS before FSA can provide financing. Examples of conservation practices include installation of conservation structures; establishment of forest cover; installation of water conservation measures; establishment or improvement of permanent pastures; transitioning to organic production; manure management, including manure digestion systems; etc.

NAP Coverage

FSA September Newsletter

The Non-Insured Crop Disaster Assistance Program (NAP) was designed to reduce financial losses that occur when natural disasters cause a catastrophic loss of production or prevented planting of an eligible crop by providing coverage equivalent to catastrophic (CAT) insurance. Statute limits NAP to each commercial crop or agricultural commodity, except livestock, for which CAT is not available.

The application deadline dates for 2011 coverage is as follows:

- 11/20/2010 - Apples, Apricots, Blueberries, Caneberries, Cherries, Cranberries, Grapes, Honey, Nectarines, Onions, Peaches, Pears, Plums, Scallions & Shallots
- 12/31/2010 - Asparagus, Beets, Broccoli, Cabbage, Carrots, Cauliflowers, Greens, Herbs, Horseradish, Kohlrabi, Leeks, Lettuce, Parsnip, Peas, Potatoes, Radishes, Rhubarb & Turnips
- 3/15/2011 - Beans, Brussel Sprouts, Cantaloupe, Celery, Corn, Cucumbers, Eggplant, Honeydew, Oats, Okra, Peppers, Pumpkins, Sorghum, Sorghum Forage, Soybeans, Squash, Sunflower, Sweet Potatoes, Tomatillos, Tomatoes, Watermelon and Yams

Some of these crops are actually covered by independent crop insurance agents. This will vary by county. The following crops are covered by independent crop insurance agents for these counties:

- **Atlantic County** - Apples, Blueberries, Corn, Fresh Market Sweet Corn, Nursery, Peaches, Potatoes and Soybeans
- **Cape May County** - Corn, Fresh Market Sweet Corn, Nursery, Processing Beans and Soybeans
- **Cumberland County** - Apples, Barley, Corn, Fresh Market Sweet Corn, Nursery, Peaches, Potatoes, Processing Beans, Soybeans, Tomatoes and Wheat.

Producers who already have coverage on 2010 NAP crops may choose to continue coverage on the same crop or crops for 2011, if the applicable service fee is submitted by the application closing date. A new CCC-471, application for coverage is not required to be signed when applying for continuous coverage of the same crop or crops.

Producers who choose to add a new crop(s) or delete a crop(s) from the previous year’s coverage or change crop shares must file a new CCC-471 with signatures and pay the applicable service fee.

Producers with 2010 NAP coverage must remember to complete the following to qualify for benefits:

- Timely file acreage reports and keep track of harvested production using acceptable methods. For example, bale weights or other means of determining quantities of hay are required.
- File a “Notice of Loss” within 15 days of when a loss is apparent, due to drought, hail, etc.
