CENSUS OF HORTICULTURE TAKING PLACE

Asking Producers to Participate in Survey
USDA National Ag Statistics Service

NASS is conducting the 2014 Census of Horticultural Specialties to gather detailed information on horticultural production and sales across the United States. There is still time to be counted and show the importance of what you do for the economy of New Jersey. The Census of Horticulture includes producers of floriculture, nursery and other specialty crops. According to the most recent Census of Agriculture, nursery and floriculture products were almost a $359 million industry just in New Jersey. This special census is an opportunity for producers to provide detailed information on their industry to help ensure the continued growth and sustainability of horticultural farming.

Last conducted in 2009, this census will provide the only source of comparable and consistent data at the national and state levels for the industry. NASS will gather information on horticultural activities conducted during 2014, including production of horticultural crops, value of products, square footage used for growing crops, production expenses and more.

Participation is important. This is a unique opportunity to provide information that will be used by policymakers, organizations and businesses for the next several years to help make decisions regarding the availability of goods and services, funding, policies and other key issues that affect the industry.

Producers can fill out the Census online via a secure website, www.agcensus.usda.gov, or return the form by mail. Federal law (Title 7, U.S. Code) requires all producers who receive a form to respond and requires NASS to keep all individual information confidential.

NASS will publish results in December 2015. For more information about the Census of Horticulture, visit www.agcensus.usda.gov or call (717)787-3904.
Pesticide Recertification Credits

Still need recertification credits? Pesticide applicators can obtain 2 Core units and 4 units in each category that they are certified in over their 5 year recertification period by completing available on-line courses. Check the DEP website for a list of on-line courses currently available.

For classroom style courses in Cumberland County, contact Paul Stanziale 201-874-4453. Dates for those classes is April 16, May 14 and June 18th. These classes are not held at the Extension Center, they are held at various locations, check the website or contact Paul Stanziale for details.

Classes are also available through the following sources:

- All Star Professional Training 817-385-1136
- Pesticide Training & Consulting Kathy Roberts 315-288-4954
- Pested Kevin Hurley 845-687-6483
- Farm Press Cheryl Ogle 559-298-6070
- Sterile Processing 908-735-8944
- Environmental Mgmt. Training Ayanna Martin 215-796-5318
- Continuing Education University Aaron Mackie 251-583-5972

Sign-up for the above mentioned classes can be accessed on-line at:
www.midatlanticpesticiderecertification.com/

Remaining credit classes at the Cumberland County Extension Office, 291 Morton Avenue, Rosenhayn are:

April 14th Structural & Household Pests Credits: 7A—6 units
May 7th Tree Fruit & Grapes Credits: Category 13—2 units
                          Categories 1A & PP2—6 units
May 12th Pesticides Credits: Categories 1A, PP2 & 10—2 units
                          CORE—6 units

These classes are held at the Cumberland County Extension Office, 291 Morton Avenue, Rosenhayn; 9am-noon; $20 per person. To register call Tammy 856-451-2800 x1.
Crop Insurance for fruits & Vegetables
Proposed Expansion
Sara Wyant, Agri-Pulse Communications, Inc.

USDA is proposing changes that could lead to the expansion of crop insurance to additional crops, including many fruit and vegetables.

The proposed rule addresses changes required under the 2014 farm bill - supported by Debbie Stabenow, D-Mich., the ranking member of the Senate Agriculture Committee and other panel members -- that will reform USDA's process for developing new crop insurance policies.

"For too long the federal crop insurance program hasn't fully included our nation's fruit and vegetable growers," said Stabenow. "That's why we fought for reforms in the farm bill to put these producers on equal footing with traditional commodities."

In addition, Stabenow said, "We should be encouraging the production of fruits and vegetables with the same level of commitment that we support row crops and traditional commodities."

The proposed rule is aimed at improving the submission process for insurance policies to the Federal Crop Insurance Corp.

The Federal Crop Insurance Act allows private individuals and groups with crops or livestock to develop insurance products for consideration and approval by the FCIC board of directors.

The proposed rule requires the board to first consider underserved and uninsured commodities. The second consideration must be policies for commodities that have inadequate coverage or low levels of participation under existing insurance products. Policies that do not fit into the first two categories may then be considered, according to USDA's Risk Management Agency (RMA).

The board also would have the authority to approve an advance payment of an additional 25 percent, above the current 50 percent, of estimated research and development costs of products that the board determines provide coverage for underserved regions or crops, including specialty crops.

In addition, the proposed rule includes funding for a pilot program for a new type of insurance that targets previously uninsured producers.

"These improvements will help expand and improve crop insurance to underserved crops," RMA Administrator Brandon Willis in a release. "We are continuing our work to ensure that a wider variety of producers have access to sound risk management tools to keep themselves protected from disaster."

The proposed rule is available at the Federal Register. The public comment period is open until April 27. More information on FCIC and the 508(h) process is available on the RMA website. http://www.rma.usda.gov/fcic/index.html
Protecting Bees & Pollinators:
What Horticulture Needs to Know

The Horticultural Research Institute, in collaboration with AmericanHort, Society of American Florists, and the American Floral Endowment, released an educational video that provides information on the horticultural industry’s essential role in bee and pollinator stewardship.

Titled, “Protecting Bees & Pollinators: What Horticulture Needs to Know,” the video narrates the current state of bee and pollinator health, provides information on factors that impact pollinators and the environment including the use of pesticides, and underscores the beneficial role horticulture plays in providing healthy and nurturing pollinator ecosystems.

The video serves as a valuable resource to industry professionals and horticulture enthusiasts by providing an overview of all the factors affecting bee and pollinator health today.

“Very few businesses can be more beneficial to bees and pollinators in this country than horticulture,” states John Coulter, President of the Horticultural Research Institute. “Our passion is to grow healthy plants and flowers. Our products offer the very thing pollinators need to thrive: diverse and ample sources of forage.

Read more about the video by visiting: www.njna.org

Vegetable & Fruit Growers Needed

Do you grow vegetables and/or fruit? If so, your input is needed.

Take the food Safety Survey sponsored by the University of Maryland. Visit: www.aredept.umd.edu/foodsafety/  (password: VGANJ)

Your participation in the survey is greatly appreciated. We are gathering information on the current prevalence and burden of different food safety risk-reduction strategies for vegetable and fruit growers nationwide.

Participants can enter a drawing to win an Apple iPad.
Pesticide Storage Inventory List

In New Jersey all licensed pesticide applicators who store pesticides are required per N.J.A.C. 7:30-9.5 to maintain a list of the pesticides stored or likely to be stored during the license year. A storage inventory should be kept separate from the actual storage area.

All licensed pesticide applicators who store pesticides are required by law to send a copy of their storage inventory with an explanatory cover letter to the local fire company along with a description and/or diagram of the actual location of each storage area. Submittal to the local fire department is required annually by May 1st of each year. Applicators must keep the cover letter on file for a minimum of three years and should have it available for NJDEP upon request.

Attached to this newsletter is a sample cover letter, pesticide storage inventory list, pesticide application record as well as details on the above mentioned requirements.

Cumberland County Agriculture
Background Information Continued

While the number of farms and overall acreage devoted to agriculture have decreased slightly in the past decade, the overall value of agricultural products sold by those farmers has increased, from $156,939,000 in 2007 to $170,362,000 in 2012.

Several produce auctions in the county account for $70 million of the purchases from farmers and employ another 25-30 people.

The increase of the value of farm products sold is due in some part to the increased productivity of the existing farms, increased yields and an upward trending price-point profile for agricultural products. Consumer trends in the grocery industry show that consumers place a premium on agricultural products grown closest to where they live.

As more farmers move from selling their crops as commodities to wholesalers/retailers and sell more of what they produce directly to the public, they can command higher prices from consumers who enjoy the experience of coming directly to the farm or a nearby farmers market to buy directly from the farmer and ask questions about how their agricultural products were grown.

The interest in “agri-tourism” is helping farmers in Cumberland County diversify their operations by adding pick-your-own or other types of attractions that draw consumers to their farms.

The other significant avenue for marketing agricultural products is the numerous food processors in the county; such as Seabrook Farms, F&S Produce and Progresso Foods.

In the dairy sector, Bridgeton is home to Cumberland Dairies, which specializes in creating frozen dessert dairy items for restaurants such as McDonald’s.

On the opposite end, agriculture helps support numerous businesses in the County and the surrounding area with supplies needed for feed, fertilizers, equipment and even livestock to run the operations.
Calendar of Important Events

Indicates the newly added event since last calendar

April 2015

April 7
Twilight Tree Fruit Meeting I, Gloucester County Extension Office, 1200 N. Delsea Drive, Clayton, NJ; 7pm-9pm. Bring plant, disease or week sample for identification. For more information call Hemant Gohil 856-307-6450, x1.

April 7
Sports Field Managers Association Spring Field Day, Eastampton Sports Complex & Rancocas Valley Regional High School, Mount Holly, NJ; 7:30-3:00. Pre-registration Free; on-site $15. For more information call 856-514-3179, email: mail@sfmanj.org or visit: www.sfmanj.org

April 8-10
Farm Energy IQ-Training for NE Ag Service Providers in NJ, Rutgers EcoComplex, Bordentown, NJ; Full Workshop $140.00. For more information or to register visit: www.eventbrite.com/e/farm-energy-iq-training-for-ne-ag-service-providers-in-nj-tickets-15000595184?aff=erelexporg

April 11
Field to Finish “Meet and Greet”, Dream Park Annex Room, 400 Rt. 130 South, Logan Twp., NJ; $20 includes Dinner, drinks & complimentary film showing of “Farmland”; 7pm-10pm. For more information call 856-241-1415.

April 14
Structural & Household Pests, Rutgers Cooperative Extension, 291 Morton Avenue, Rosenhayn; 9am-noon; $20. Pesticide credits: 6 for Category 7A. For more information call Tammy Commander at 856-451-2800 x1.

April 23
South Jersey Vegetable Twilight Meeting, East Vineland Fire Hall, Landis & Union Roads, Vineland. For more information contact Rick VanVranken at 609-625-0056.

April 23-25
Bee-ginner’s Beekeeping, Rutgers Continuing Education, 102 Ryders Lane, New Brunswick. For more information visit: www.cpe.rutgers.edu/BEES

April 28
Plant Growing, Rutgers Cooperative Extension, 291 Morton Avenue, Rosenhayn; 9am-noon; $20. For more information call Tammy Commander at 856-451-2800 x1.

April 28
Twilight Tree Fruit Meeting II, Gloucester County Extension Office, 1200 N. Delsea Dr., Clayton, NJ; 7pm-9pm. Bring plant, disease or week samples for identification. For more information call Hemant Gohil 856-307-6450 x1.
May 2015

May 5
**Status of Beekeeping in New Jersey**, Rutgers Cooperative Extension, 291 Morton Avenue, Rosenhayn; 9am-noon; $20. For more information call Tammy Commander at 856-451-2800 x1.

May 7
**Tree Fruit & Grapes**, Rutgers Agricultural & Research Extension Center, 121 Northville Road, Bridge- ton; 9am-noon; $20. Pesticide credits: 2 for Category 13; 6 each for 1A and PP2. For more information or to register call Tammy Commander at 856-451-2800 x1.

May 12
**Pesticides**, Rutgers Cooperative Extension, 291 Morton Ave., Rosenhayn; 9am-noon; $20. Pesticide credits: 2 each for categories 10, 1A & PP2 and 6 for CORE. For information or for registration call Tammy Commander at 856-451-2800 x1.

May 19
**Animals: Friend or Foe**; Rutgers Cooperative Extension, 291 Morton Avenue, Rosenhayn; 9am-noon; $20. For more information call Tammy Commander at 856-451-2800 x1.

May 21-23
**Bee-ginner’s Beekeeping**, Rutgers Continuing Education, 102 Ryders Lane, New Brunswick. For more information visit: www.cpe.rutgers.edu/BEES

Pesticide Applicator Records

It is extremely important that licensed pesticide applicators maintain accurate records of each pesticide application made. In New Jersey, all licensed pesticide applicators are required to maintain application records of any pesticide applied, whether it is a restricted or general use pesticide. Additionally, licensed pesticide applicators must maintain records of the active ingredient used, as well as record of any applicator or operator on-the-job training.

As a service, we have provided below template forms that incorporate the three types of required records into a single form. These forms have been reviewed by the NJDEP Pesticide Control Program to be compliant with the 2008 revised regulation changes in required records. The forms below are an option and are not required to be used. If you choose, you may devise your own record keeping system as long as it is in compliance with the applicable regulations.

Records of all pesticide applications must be maintained on file as follows:

- Private applicators: 3 years
- Commercial applicators: 3 years; with the exception of termicide applications, which must be maintained on file for a minimum of 5 years.

Consult the New Jersey pesticide control regulations online or contact the NJDEP Pesticide Control Program by phone at 609-987-4070 for more specifics. The NJDEP released a policy clarification on pesticide record keeping in October of 2002, which is posted for your convenience. Call the NJDEP for further clarification.

Pesticide Applicator Storage Inventory Submittal

In New Jersey, all licensed pesticide applicators who store pesticides are required per N.J.A.C. 7:30-9.5 to maintain a list of the pesticides stored or likely to be stored during the license year. A storage inventory should be kept separate from the actual storage area. See below for a template form that meets the requirements for a single storage location address. The purpose of the inventory is to provide local fire departments with an accurate description of things stored by location in case of fire or other emergency. We suggest filling out a form per storage address of your establishment. You may also devise a form that suits your needs as long as it meets the requirements of N.J.A.C. 7:30-9.5.

All licensed pesticide applicators who store pesticides are required by law to send a copy of their storage inventor(ies) with an explanatory cover letter to the local fire company along with a description and/or diagram of the actual location of each storage area. Specifically, NJDEP regulations provide: "The cover letter shall explain that this list has been sent pursuant to N.J.A.C. 7:30-9.5(b).4". See below for a template submittal letter that meets the requirements.

Submittal to the fire department is required annually by May 1st of each year. (This does not pertain to pesticides stored for personal use, or to those storing pesticides at loading or application areas for less than 7 days.) Applicators must keep the cover letter on file for a minimum of three years and should have it available for NJDEP upon request.
